## PREFABRICATED CHIMNEY DRAINS

americanwick.com

### PRODUCT OVERVIEW

SITEDRAIN C-180 Series prefabricated chimney drains are constructed by fully wrapping a high strength, high flow capacity, formed polystyrene drainage core with a nonwoven filter fabric. The filter fabric is bonded to the core and prevents soil intrusion into the flow channels while allowing water to freely enter the drain core from one side.

SITEDRAIN C-180 chimney drains are available in 12", 16" and 24" widths, and provide a time saving, effective drainage solution for reducing hydrostatic pressure against retaining walls where full wall coverage is not required or feasible. SITEDRAIN C-180 is available with filter fabrics meeting AASHTO M 288-06 specifications.

1 - PP = Polypropylene; HIPS = High Impact Polystyrene

2 - AASHTO Designation: M 288-06 Standard Specification for Highway Applications; American Association of State Highway and Transportation Officials, 2006. Geotextile survivability classification from installation stresses in subsurface drainage applications.

3 - In-plane flow rate measured at 3,600 psf (172 kPa) compressive load and a hydraulic gradient of 1.0.
